DESCRIPTORS Elementary Secondary Education; Ethnic Groups; Institutional Characteristics; Profiles; School Demography; *School Districts; School Funds; *School Statistics; Standardized Tests; *State Surveys; *Student Characteristics; *Teacher Characteristics; Testing Programs; *Test Results
IDENTIFIERS American College Testing Program; Comprehensive Tests of Basic Skills; *New Mexico; New Mexico High School Proficiency Examination

ABSTRACT

The purpose of this report is to provide a broad cross section of data on the operation and performance of New Mexico public schools. Data on school district characteristics (40-Day Average Daily Membership; and percent in kindergarten, bilingual, Chapter 1, and special education programs), teacher characteristics (pupil-teacher ratio, salaries, experience, education, and ethnicity), pupil characteristics (ethnicity, grade repeaters, dropout rate, and mobility), school finance (expenditures per pupil and income), high school graduates, and test results (American College Testing program, Comprehensive Tests of Basic Skills, and New Mexico High School Proficiency Exam) are presented for each school district. The profile has three major sections. Section I explains each variable, cites data sources, and briefly discusses the data. Section II contains tables of the actual value of variables used in Section III. Section III presents horizontal bar graph displays of school district and statewide data, arranged alphabetically by school district. The New Mexico school districts are very diverse in community resources and limitations which has a major impact on the data in this report. Conclusions about educational quality in a district or districts cannot be made without additional knowledge of non-educational parameters. (Author/BS)

INTRODUCTION

This issue of the New Mexico School District Profile is the thirteenth annual edition. Since the first issue, published for the 1970-71 school year, the Profile has evolved in both form and content. Some new variables have been added and others deleted; however, the nature and purpose of the document remain unchanged. The Profile represents an effort to provide a broad cross section of data bearing on the operation and performance of public schools in New Mexico. This document presents data on school district characteristics, teacher characteristics, pupil characteristics, school finance, high school graduates, American College Testing (ACT) results, and results of standardized testing programs for each of New Mexico's school districts. Its purpose is to provide useful information about New Mexico public schools to citizens, parents, educators, legislators, and other interested parties.

The Profile is divided into three major sections. Section I contains explanations of each variable in the report, source citations, and a brief discussion of the data. Section II consists of tables which contain the actual values of variables used in Section III. Section III contains graphic presentations of the data by school district with statewide values also displayed. The districts are arranged alphabetically with two facing pages for each district. The districts' data are displayed as a horizontal bar graph represented by a solid box ■. Statewide data are presented as an unfilled □. Note that the values above the bars are not the same for each characteristic; some are percentages, others are dollars, ratios, and the like.

It is not the purpose of this publication to compare one school district's "excellence" with another, either directly or by implication. The graphs and tables will not tell how "good" or "bad" a district's program is, nor can any major generalizations be made about all districts from this information. The districts in New Mexico are very diverse in community resources and limitations which can have a major impact on the values presented herein; it would be inaccurate to draw any conclusions without additional knowledge of the non-educational parameters. The graphs and tables should be viewed as indicators only and must be used in conjunction with a wider range of information sources before arriving at any judgements concerning the quality of education in a particular district or group of districts in New Mexico.

SECTION I

OVERVIEW

This section presents an explanation of each variable used to "profile" each district in Section III. Additionally, this section provides source references and, where appropriate, a brief discussion of the data.

DISTRICT CHARACTERISTICS

40-Day Average Daily Membership

The 40-Day Average Daily Membership (ADM) for each district during the 1982-83 school year is presented at the top left hand corner of the district's first page. This figure represents the average of the actual student membership for the district on the 20th and 40th day of the 1982-83 school year. These figures include all students enrolled in grades K through 12. The 40-Day ADM in New Mexico school districts ranged from 25 to 72,518 students. Total enrollment for the state was 258,744, a decrease of approximately 12 from the previous school year. These data are published by Public School Finance, Department of Finance and Administration.

Percent Change in ADM

The percent change in ADM reflects the change in the 40-Day ADM over the five-year period from 1977-78 to 1982-83. The statewide change in ADM over this six-year period represents a 5.1% decline in enrollment. Changes in individual district enrollment varied from a loss of 71.9% to a gain of 44.6 with 60 districts experiencing net decreases and 27 districts experiencing net increases in enrollment. These data are published by Public School Finance.

Percent in Kindergarten

This figure is a percentage which represents the number of children in early childhood education classes as a percent of 180-day first grade enrollments. The state average is 96.4%. Where district values are greater than 100%, there are more children in early childhood education than in first grade. These data are published by Public School Finance.

Percent Bilingual

The percent in bilingual education is found by adding the number of children in state and federal bilingual programs and determining the percent they represent of the 180-day membership in grades 1 through 3. Percentages which exceed 100% indicate that bilingual programs in that district extend beyond the third grade. During the 1982-83 school year, 42 districts offered bilingual education programs. The percent bilingual has declined from 69.3% in 1977-78, to 53.3% in 1982-83. There were a total of 28,863 students in state programs and 2,393 in federal and the Title VII Bilingual Technical Assistance Unit.

Percent Chapter I

This figure is the percentage that Chapter I participants represent of the 40-day membership for grades 1 through 12. All New Mexico districts except Animas, Encino, Los Alamos, and San Jon had a Chapter I program. Dora, Elida, Floyd, and Portales participated in the Roosevelt County Co-op and are reported under Portales. The percentage of Chapter I students statewide decreased from 11.1% in 1978-79 to 10.2% in 1982-83. The Chapter I membership data were used as reported to the State Department of Education's Chapter I Office.

Percent Special Education

This statistic reports the number of children in C, D, and DNP level special education programs as a percent of the 180-day membership. These students have learning needs which are moderate to severe, and receive instruction in self-contained classrooms. This instruction is carried out by a special education teacher using an individualized educational plan appropriate to the student's learning needs. Whenever possible, these students are integrated into general school activities. While every school district in New Mexico provides special education services, some districts do not have any students placed in C, D, or DNP level programs, hence their percent special education values are reported as 0.0. In these cases, A and B level special education classes are provided for students whose needs are minimal to mild. The statewide average is 4.2% in special education, as compared to 3.9% in 1981-82, 3.7 in 1980-81, and 3.3% in 1979-80. These data were published by Public School Finance.

TEACHER CHARACTERISTICS

Pupil-Teacher Ratio

This statistic is the ratio of the number of pupils per teacher in grades 1 through 12, including special education classes. Pupil data (40-Day ADM) are published by Public School Finance and teacher data are from the State Department of Education's Data Management Unit's teacher master file.

The pupil-teacher ratio for New Mexico school districts ranged from a low of 6.3 to a high of 20.4 with a statewide ratio of 17.4. The statewide pupil-teacher ratio for 1982-83 continued the steady decline observed in previous years. A five-year overview of this effect is presented in Table I.

Table I
Pupil-Teacher Ratios

Year	Pupil-Teacher Ratio
1978-79	19.3
1979-80	18.5
1980-81	18.2
1981-82	17.8
1982-83	17.4

Average Teacher's Salaries

The average salary for a New Mexico teacher in 1982-83 was $20,068, up from $18,510 in 1981-82. Average salaries in New Mexico school districts varied in 1982-83 from a low of $14,470 to a high of $26,908. These data were compiled from the State Department of Education's Data Management Unit's teacher master file.

Average Years Experience

The average years of teacher experience in New Mexico in 1982-83 was 11.2 years, up from 11.1 years in 1981-82. Average years experience for teachers in individual districts in 1982-83 ranged from a low of 6.4 years to a high of 23.5 years. This information was calculated from the State Department of Education's Data Management Unit's teacher master file.

A five-year overview of average years teacher experience for New Mexico is presented in Table II.

Table II
Teacher Experience

Year	Teacher Experience
1978-79	11.7
1979-80	10.5
1980-81	10.5
1981-82	11.1
1982-83	11.2

Percent MA or Higher Degree

This statistic indicates the percent of teachers who possess a Master's degree or higher. During the 1982-83 school year, 45% of New Mexico teachers possessed a Master's degree or higher. The information was derived from the State Department of Education's Data Management Unit's teacher master file. A five-year overview of progress in this area can be seen in Table III.

Table III
Master's Degree or Higher

Year	Percent with Master's Degree or Higher
1978-79	40
1979-80	41
1980-81	43
1981-82	43
1982-83	45

Percent of Teachers (by Ethnicity)

These data were computed from the State Department of Education's Data Management Unit's teacher master file. The total percentage may not add to 100% because of rounding and nonresponse. In 1982-83, Anglos constituted 72%, Hispanics 24%, and Native Americans 1% of the teacher population. In six districts the teaching staff was 100% Anglo.

PUPIL CHARACTERISTICS

Percent of Students (by Ethnicity)

This statistic represents the percentage of students in each of New Mexico's three major ethnic groups (Anglo, Hispanic, Native American) enrolled in grades 9 through 12. These three ethnic groups constitute 96% of all students enrolled in these grades. Anglo students comprised 46% of the total, Hispanics 41%, and Native Americans 9%. One school district had a grade 9 through 12 enrollment which was 100% Anglo and three districts had Hispanic enrollments in excess of 95%. These data were collected by the State Department of Education's Evaluation, Testing, and Data Management Unit as part of the annual School Dropout Survey.

Primary Grade Repeaters

Each fall, the State Department of Education's Evaluation, Testing, and Data Management Unit gathers data on the number of students who are repeating grades 1 through 3. The statistic presented here represents the grade 1 through 3 repeaters as a percent of the 180-day membership in those grades. Eight districts reported no students repeating grades 1 through 3, the highest percent repeating in any district was 14.8%, and the state average was 4.4%.

High School Dropout Rate

This statistic represents the number of dropouts in grade 9 through 12 expressed as a percent of the 180-day membership for those grades. Ten districts reported no dropouts and the highest percentage of dropouts was 24.6%. The statewide percent was 7.2% in 1982-83 as compared with 8.1% in 1981-82. These data are collected annually by the State Department of Education's Evaluation, Testing, and Data Management Unit and serve as the basis for the annual State Department of Education publication entitled New Mexico Dropout Study.

Mobility Rate

The mobility rate reflects the movement of students in and out of a school district during the year. The method of calculation is to add all students who enter the district after having been previously enrolled in another district or state to the number of students who withdrew during the year, subtract those who subsequentially returned, and divide the result by the 180-day membership. The mobility rate varied from a low of 7.0% to a high of 51.9%, with a state average of 28.8%. The state average in 1979-80 was 28.3%., in 1980-81 the average was 28.9%, and in 1981-82 the percent was 30.2%. These data were collected by the State Department of Education's Evaluation, Testing, and Data Management Unit.

SCHOOL FINANCE

Expenditures per Pupil

The dollar figures presented here represent net operational costs per pupil. These data were published by Public School Finance. The range of per pupil expenditures varied from a low of $1,987 to a high of $6,724 with a state average of $2,316. Table IV clearly illustrates the trend in per pupil expenditures over the past ten years.

Table IV
Expenditures Per Pupil Per Year

Year	Expenditures per Pupil	Percent Increase
1973-74	$ 758	8.8%
1974-75	862	13.7%
1975-76	997	15.7%
1976-77	1,120	12.3%
1977-78	1,224	9.3%
1978-79	1,391	13.6%
1979-80	1,556	11.9%
1980-81	1,776	14.1%
1981-82	2,092	17.7%
1982-83	2,316	10.7%

Percent Income

School district funding is divided into three categories: local, state, and federal. The figures presented signify the percent that each category represents of total income. Local funding varied from a low of 1.2% to a high of 65.0%. State funding varied from a low of 34.9% to a high of 98.2%. Federal funding varied from a low of 0.0% to a high of 55.3%. The state's contribution is determined by the state funding formula. These data were published by Public School Finance.

HIGH SCHOOL GRADUATES

All the data in this section were taken from the State Department of Education's Evaluation, Testing, and Data Management Unit.

The number enclosed by the vertical lines is the actual number of high school graduates. In 1983, a total of 16,560 students graduated from public high schools in New Mexico as compared with 17,635 in 1982. (Note that the Loving and Encino districts do not have a high school.) A five-year overview of the number of high school graduates is presented in Table V.

Table V
Number of High School
Graduates by Year

Year	Graduates
1978-79	18,762
1979-80	18,334
1980-81	17,935
1981-82	17,635
1982-83	16,560

Percent Planning College

This statistic represents the percent of high school seniors planning to continue their education beyond high school. District percentages vary from a low of 0% to a high of 85% with a statewide percentage of 48%.

ACT TESTING PROGRAM

ACT Test-Number Taking

The American College Test (ACT) is taken by most of New Mexico's college-bound seniors and a few juniors. Some students take the SAT, others plan to attend colleges which do not require a standardized test for admission purposes. During the 1982-83 school year, 10,949 New Mexico students took the ACT exam. The percentages of students planning college and the numbers taking the ACT for the last five (5) years are presented in Table VI.

Table VI
College-Bound Students

Year	Percent Planning College	Number Taking the ACT
1978-79	47	10,168
1979-80	47	10,290
1980-81	49	10,692
1981-82	49	10,484
1982-83	48	10,949

ACT Mean Scores

This is the mean composite score for each district. The range of possible scores is from 1 to 36, with a national mean of 18.3 and a state mean of 17.4. The ACT is designed to measure reading comprehension and general knowledge in English, Mathematics, Social Studies, and Natural Sciences.

STATEWIDE TESTING PROGRAM

CTBS Composite Scores

The Comprehensive Tests of Basic Skills is given statewide each year to all students in grades 3, 5, and 8. A complete battery includes six basic skills areas: Reading, Language, Mathematics, Reference Skills, Science, and Social Studies. The value presented in the Profile is the composite score national percentile which is derived using only the Reading, Language, and Mathematics subtests. Each bar chart represents CTBS composite scores in percentiles.

The state 3rd grade mean score was at the 54th percentile, the 5th grade mean was at the 54th percentile, and the 8th grade mean was at the 52nd percentile.

New Mexico High School Proficiency Exam

The New Mexico High School Proficiency Examination (NMHSPE) is administered to all New Mexico 10th grade students, and, in subsequent years, to 11th and 12th grade students who have not met the minimum proficiency standard. Students who satisfactorily complete the exam are awarded a seal of recognition which is affixed to the student's diploma at the time of graduation.

The examination consists of test items which assess the following skill areas: Computation, Identification of Facts and Terms, Problem Solving, Reading, and Writing. There are also five content areas which are assessed: Community Resources, Consumer Economics, Government and Law, Occupational Knowledge, and Health.

The percent passing expresses the percentage of students who achieved or surpassed the proficiency standard. The state average was 89% passing. The mean scale score represents the average scale score for all students.
